

■ It's about the tools we use everyday

- IntelliJ
- VSCode
- Neovim, btw
- Figma
- Shell setup
- Git

■ Who here has read the user manual for any one of the tools you use every day?

RTFM

- Read
- The
- F...

RTFM

- Read
- The
- Friendly
- Manual

■ Basics

- How fast does your shell start?

```
for i in \$(seq 1 10); do time \${SHELL} -i -c exit; done
```

- How do you change something at the beginning of a long command?

<CTRL-e>

```
[alias]
  s = status --short
  aa = add --all
  canf = commit --verbose --all --amend --no-edit
  sw = switch
  swm = "!git switch $(git-main-branch)"
  pf = push --force-with-lease
  plra = pull --rebase --autostash
  ...
```

Git aliases

```
for al in `git --list-cmds=alias`; do
    alias g$al="git $al"
done
```

■ Git aliases

```
g canf or gcanf
```

■ Git "Pipelines"

```
gsta && gswm && gplra && gsw - && gstp && pin
```

■ Now I want to show the best feature of neovim
